## NEW FREIGHT FIGHT

District Shippers Encounter  
More Delays in South.

## REDRESS NOW TO BE SOUGHT

Further Instances Reported of Difficulties Placed in the Way of Enterprises Seeking to Establish Themselves Here, Owing to the Red Tape Methods of the Government.

The fight for better freight service in the South is not yet over, if the facts brought to the attention of the directors of the Jobbers and Shippers' Association yesterday by F. W. Graham prove the rule and not the exception.

Mr. Graham, who is a member of the freight committee, reported the results of a test case made of a carload of meats sent by him to a consignee in Harrisonburg, Va.

Mr. Graham said at the meeting of the directors yesterday afternoon that he had been accustomed to send his freight of this class by the Baltimore and Ohio road, around by Harpers Ferry, because it had been impossible to get delivery of goods over the Southern road within six days. Mr. Graham further added he had been invited by the local agent of the Pennsylvania road to ship a carload of freight by the more direct route and try the effect of the billing arrangements at the Potomac yards. This was done. The car went out of Washington promptly, and left the Potomac yards the same night. That was a week ago, but up to yesterday noon the goods had not arrived at Harrisonburg.

## Delays at End of Line.

As Mr. Graham put it, the old delays have been remedied at the transfer point in Alexandria, but the vexatious slowness of the handling of way freight over some of the Southern lines continues. Mr. Graham presented to the directors letters and statements to prove that the car was dispatched from Washington and delivered to the Southern road promptly in the Potomac yards.

After discussing the matter at some length the directors decided that this specific case should be taken up immediately with the freight managers of the Southern system, with a view to ascertaining the cause of delay, and to seek redress, if it could be had. Monroe Luchs and Mr. Graham were appointed a subcommittee to take up the subject with the officials of the railroad.

A letter was read to the directors from a manufacturer of shoes in Lynchburg, Va., informing the committee, appointed at a previous meeting to consider the subject, that he was not in a position to do more than establish a sample room in Washington. It was determined that no further effort be made to interest manufacturers in Lynchburg, but that two members of the committee go to Boston in the near future to talk over the situation with manufacturers there, with a view to locating a shoe house here to supply the Southern trade.

One of the directors called attention to the efforts of J. E. Smith, of Baltimore, to establish a branch paper-box factory in Washington. He said Mr. Smith had opened an office here, had taken some orders, and had set about establishing a plant for manufacture in South Washington.

Tied Up with Red Tape.  
He had made application to the District authorities for permission to install a small electric plant for the factory. His application went in six weeks ago at the District Building, and had been going
